Program Description

Introducing our AI Workshops for High School Students—a comprehensive program designed to ignite interest in artificial intelligence and equip students with essential skills for the future.

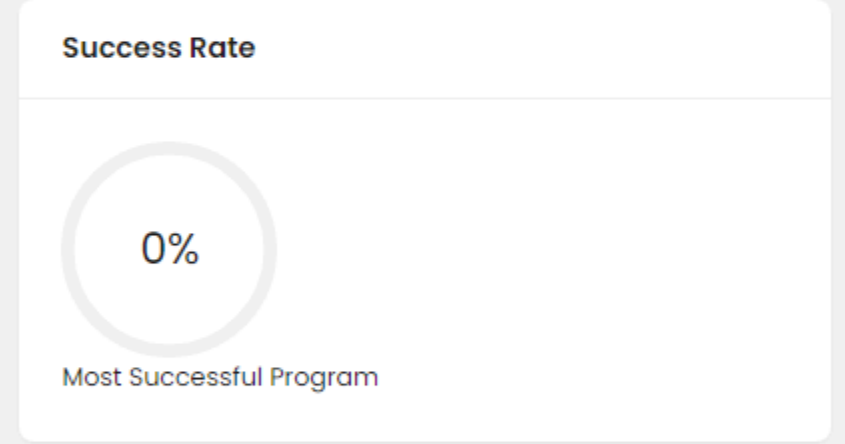

Program Highlights:

- Hands-On Learning:** Students engage in interactive projects, applying AI concepts in real-world scenarios.
- Expert Instructors:** Workshops led by experienced professionals in the AI field, ensuring valuable insights and mentorship.
- Tech Tools:** Access to cutting-edge AI software and tools, fostering technical proficiency and creativity.
- Team Collaboration:** Group activities encourage teamwork, critical thinking, and problem-solving skills.
- Career Exploration:** Discussions on various AI career paths and opportunities, inspiring students for future studies.
- Flexible Schedule:** Multiple sessions available to accommodate different school schedules, ensuring accessibility for all.

Empower your students to harness the power of AI and prepare for a dynamic future in technology!

Below two issues are added into our future roadmap

1. Each user can have more than one role
2. Admin can be a mentor or mentee

See your mentorship impacts grow within few clicks
